- May 2 – PBA Kick-off
- May 3-5 – Hands-on CasaNOSA Training
- May 11 – Quarterly Reviews

Notes from Feb 24 Meeting

- Discussed Status of PDM Action Items – STI and LFW have updated the organization of their program teams. Work is beginning on the UAV, NOAA in your Neighborhood, and Digital Services Plans. ISOS team has been recommended with Climate in the lead. COEA team for modernized cooperative observer network being formed.
- NOAA Stakeholders Meeting – Reminded everyone of the need to have programs represented and to staff the breakout sessions.
- Kickoff Meeting – Mentioned date change to March 7th. This will be a short introductory meeting. We will ask PPI for a lengthier brief to Weather and Water.
- Report from Goal and Sub-Goal Lead Off Site - We discussed potential FY08 areas of emphasis, the importance of engaging field participants in PPBES, methods of improving our efforts with the Critical Support Goal, and improvements the Goal Teams would like to make in our FY08 process.

- Facilities - Reminded everyone to provide a best effort to responding to Critical Support requests for information (e.g. Facilities information request), since this allows them to provide us a better baseline for the PBA's.
- Improving rigor - Discussed use of NWS "OSIP" requirements process for identifying and validating issues in FY08 in NWS portions of programs. Others are welcome to use. Noted NOS is developing process also.
- NOAA-IT - Discussed request for identification of FY07 adjustments which include IT. Weather and Water can facilitate, but recommended consultation with CIO's if in doubt.

Announcements

- The FY08 Schedule can be accessed at:
<https://www.ppbs.noaa.gov/calendar08.html>
- Upcoming Goal Team Meetings
 - o March 17, 8am – 1pm, SSMC-2, 2nd Floor Conference Rm
